NEWS RELEASE

GOLDEX DRILLS 15G/T AU OVER 4.5M AT EL PATO

VANCOUVER, BC – Goldex Resources Corporation (TSX VENTURE:GDX) (“Goldex” or the “Company”) today announced further high grade gold assays from the summer 2011 drill program at El Pato. The results were in keeping with previous assays released in August 2011. The final five holes reinforced the mineralization model at El Pato with significant grades reported across the board.

Highlights include 1.5m intervals of **26 g/t Au** and **14 g/t Au** in hole 16 which contains an average grade of **15 g/t Au** over **4.5m**.

These results mark the completion of the summer 2011 Drill Program and provide valuable data to better ascertain further drill targets. Bulk Sampling is currently under way as part of an overall plan that includes detailed surveying with a total station GPS and mapping, the confirmation of results in historic trenches as well as new drill targets over reduced spacing to bring results into compliance with NI 43-101. This plan will also provide the geological teams with a better understanding of the nature of the deposit at El Pato including the direction and length of the veins.

Chuck Ross, President of Goldex commented that: “Once again these results are very encouraging as all five holes showed significant mineralization. These continue a trend of better than expected results at El Pato that include the trench grades on the dip slope (see news May 18th) and the thirty metres of high grade intercepts (see news August 17th) that we now suspect may be a continuation of the vein from the dip slope into a new, previously unforeseen area. With continued drilling, ongoing geological work and the results from these drill holes we hope to prove up the figures we have on the property and potentially increase the overall resource significantly.”

Update El Arco: Goldex representatives are currently pursuing permit approval for a planned 4000m RC drill program in the state of Durango, Mexico. Approval is expected in at the end of September with the intention of having drills turning in early October.

The table below highlights sample grades over 1 g/t Au in all five holes.

id sample	Hole	From	To	Interval	Au g/t
15065	GDXP-015	91.44	92.96	1.52	2.48
15066	GDXP-015	92.96	94.48	1.52	2.34
15047	GDXP-015	27.43	28.95	1.52	1.94
15064	GDXP-015	89.91	91.44	1.53	1.55
15060	GDXP-015	48.76	50.29	1.53	1.48
15014	GDXP-016	83.82	85.34	1.52	26.30
15015	GDXP-016	85.34	86.86	1.52	14.51
15013	GDXP-016	82.29	83.82	1.53	5.65
15001	GDXP-018	101.77	103.73	1.96	6.29
15002	GDXP-018	103.73	105.81	2.08	5.43
14999	GDXP-018	100.58	101.77	1.19	2.66
14998	GDXP-018	99.06	100.58	1.52	1.11
14990	GDXP-021	30.48	32.00	1.52	5.65
14973	GDXP-021	22.86	24.38	1.52	1.20
15077	GDXP-022	111.58	112.77	1.19	13.49
15078	GDXP-022	112.77	113.94	1.17	10.95
15074	GDXP-022	108.20	109.72	1.52	3.10
15072	GDXP-022	106.68	108.20	1.52	2.58
15076	GDXP-022	109.72	111.58	1.86	2.17
15069	GDXP-022	102.10	103.63	1.53	2.13
15070	GDXP-022	103.63	105.15	1.52	1.05

Results were collected from gold by fire assay with an AA finish performed by Inspectorate Labs located in Reno, Nevada. Samples were shipped from Inspectorate Labs in Guatemala City after being transported there from the El Pato site by the Goldex geological team.

True width has not been determined.

Of a total of eighty two samples taken: twenty one contained values over 1 g/t, seven contained values above 0.5 g/t, twenty seven contained values between 0.5 and 0.1 g/t Au while the remaining samples contained < 0.1 g/t Au.

This news release has been reviewed by Larry Kornze, a qualified person consistent with NI 43-101.

About Goldex Resources Corp

Goldex is a junior resources company exploring for gold in the Americas. A twelve hole drill program has recently been completed on the flagship **El Pato** property, bulk Sampling and trenching are now underway. Goldex is in application for an Exploitation Licence at **El Pato** with a view to putting the principle areas of high grade surface mineralization on the property into production. Goldex also has rights to the **El Arco** project in Mexico which will shortly be host to a **4000m RC drill program** (see news release dated July 20th, 2011) and the **La Chorrera** property, also in Guatemala. Goldex is listed on the Toronto Venture Exchange (**TSX VENTURE:GDX**).
